

PROTEAK. RENEWABLE FORESTRY.

Our plantations are organically grown on Mexico's Pacific coast. Following years of careful attention to environmentally and socially responsible forestry practices, Proteak guarantees that all plantations are sustainably grown, legally harvested and in compliance with rigorous environmental standards.

FUNCTIONAL ARTISTRY.

The grandest of tropical hardwoods, teak is valued for its durability, sophisticated look and resistance to the elements. Proteak's densely rich and finely crafted teak wood products provide lasting satisfaction with minimal care.

BUTCHER BLOCK CARTS

Stunning and hard working.

Single handle.
Light construction.
Stainless steel base.

Double handle.
Heavy construction.
Stainless steel base.

Single handle.
Light construction.
Stainless steel base.
Inset cutting boards.

Proteak's butcher block carts are stunning and hard working. Made of five-inch-thick end grain teak and supported by sturdy stainless steel bases, these blocks will add a distinctive, unique and functional touch to any kitchen environment. Solid construction and natural durability combine to create a family heirloom for current and future generations.

CLASSIC CUTTING BOARDS

Geometric simplicity and outstanding performance.

Proteak has designed its line of cutting boards to meet the needs of professional chefs and serious home cooks, as well as of those looking for kitchen accessories that are as aesthetically pleasing as they are functional. From heavy-duty end grain chopping blocks to slim cutting boards that double as cheese platters, Proteak has introduced a compelling product line that challenges conventional thinking about cutting boards.

SPECIALTY CUTTING BOARDS

Useful features and eye-catching designs.

End grain with inset cutting boards.

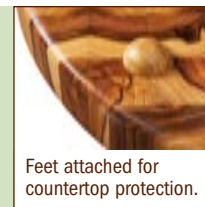

Edge grain with side handles.

End grain with side handles and front bowl cut-out.

Cut-out handles for easy lifting.

Feet attached for countertop protection.

Sauté pan cut-out for transferring of food.

Proteak also offers several features that can be added to our classic cutting boards. These

features include canals, feet, handle cut-outs, sauté pan cut-outs and cutting board inserts.

Additionally, Proteak is constantly innovating with new shapes and grain constructions in our effort to transform the cutting board market.

END GRAIN

Classic butcher block construction for your heavy-duty chopping needs. Available in various shapes and sizes.
(See insert or visit www.proteak.com for specific dimensions.)

Round

Rectangular

Octagonal

FACE GRAIN

Wide strip construction. Warm, natural and richly textured, showcasing teak's dark heartwood. Available in various shapes and sizes.
(See insert or visit www.proteak.com for specific dimensions.)

Round

Rectangular

Octagonal

EDGE GRAIN

Narrow strip construction. The individual strips used to assemble the cutting board are narrower than they are thick, creating a particularly strong adhesive bond. Available in various shapes and sizes. (See insert or visit www.proteak.com for specific dimensions.)

Round

Rectangular

Octagonal

COUNTERTOPS AND ISLANDS

Striking wood grain patterns, proven durability and superior construction.

Teak wood is ideally suited for demanding kitchen environments. On a functional level, teak is an extremely durable wood that can stand up to the daily wear and tear of kitchen life. On an aesthetic level, teak countertops and islands are a distinct and attractive alternative to more common materials like maple and granite.

Face Grain/Single bevel.*

Edge Grain/Multi-bevel.*

*Available in all grains and with any custom cut. See insert or visit www.proteak.com for specifics.

Proteak countertops and islands are sold in both custom dimensions and standard-sized blanks. Available in end grain, face grain and edge grain. Finished or unfinished.

Proteak protects over 1,000 acres of virgin tropical forests adjacent to its plantations.

ENVIRONMENTAL AND SOCIAL COMMITMENT

Applying common sense to forestry and business.

- Our forests currently cover more than 7,000 acres of reclaimed ranch land along Mexico's Pacific coast.
- On a daily basis, our plantations capture the CO2 emitted by 15,000 cars.

- Our plantations provide jobs for 250 workers in traditionally low-income areas of Mexico. We pay above average wages and offer health benefits to all of our employees.
- We have planted almost 3,300,000 trees and we are still growing.
- We are the closest quality teak source to the continental United States, significantly reducing the amount of energy and emissions required to bring teak products from the plantation to your home.
- Renewable wood products store carbon, permanently removing it from the atmosphere.
